QUESTIONS 25 / 25 completed

Sum Low Tri.

SUM LOW TRI.

Write a C program to find the sum of the lower triangular elements of a matrix.

PROGRAM EDITOR

C | Run | Save

```c
#include <stdio.h>

int main() {
    int i, j, n, sum = 0;

    // Read the order of the square matrix
    printf("Enter the order of the matrix (n): ");
    if (scanf("%d", &n) != 1 || n <= 0) {
        return 1;
    }

    int mat[n][n];

    // Read elements of the matrix
    printf("Enter the elements of the matrix (%dx%d):\n", n, n);
    for (i = 0; i < n; i++) {
        for (j = 0; j < n; j++) {
            scanf("%d", &mat[i][j]);
        }
    }

```

OUTPUT

```
Enter the order of the matrix (n): Enter the elements of the
matrix (3x3):
Sum of the lower triangular elements is: 34
```

INPUT

```
3
1 2 3
4 5 6
7 8 9
```
