Multiply Scalar

MULTIPLY SCALAR

Write a C program to multiply a matrix by a scalar.

PROGRAM EDITOR

C

Run Save

```c
#include <stdio.h>

int main() {
    int r, c, i, j, scalar;

    // Read dimensions of the matrix
    printf("Enter rows and columns of the matrix: ");
    if (scanf("%d %d", &r, &c) != 2 || r <= 0 || c <= 0) {
        return 1;
    }

    int mat[r][c], res[r][c];

    // Read elements of the matrix
    printf("Enter elements of the matrix (%dx%d):\n", r, c);
    for (i = 0; i < r; i++) {
        for (j = 0; j < c; j++) {
            scanf("%d", &mat[i][j]);
        }
    }
```

OUTPUT

```
Enter rows and columns of the matrix: Enter elements of the
matrix (2x2):
Enter the scalar value to multiply: Resultant Matrix after
Scalar Multiplication[span_1](start_span)[span_1](end_span):
3 6
9 12
```

INPUT

```
2 2
1 2
3 4
3
```
