Gauss-Jordan

GAUSS-JORDAN

Write a C program to perform Gauss-Jordan elimination on a matrix.

PROGRAM EDITOR

C | Run | Save

```c
#include <stdio.h>

int main() {
    int i, j, k, n;

    // Read the number of variables / order of the matrix
    printf("Enter the order of the matrix (n): ");
    if (scanf("%d", &n) != 1 || n <= 0) {
        return 1;
    }

    float a[n][n+1];

    // Read the augmented matrix elements
    printf("Enter the augmented matrix elements (row by row):\n");
    for (i = 0; i < n; i++) {
        for (j = 0; j <= n; j++) {
```

OUTPUT

```
Enter the order of the matrix (n): Enter the augmented matrix
elements (row by row):
Solution[span_2](start_span)[span_2](end_span):
x1 = 2.00
x2 = 1.00
```

INPUT

```
2
2 1 5
1 3 5
```
